Re: The Original Air Probe Sanitizer

Dear Bill,

Please accept our sincere appreciation for the introduction of The Air Probe Sanitizer into our office environment. The air quality in our office has improved 100%; and our sinus complaints are down to virtually nothing and our computer screens and office machinery are not covered with dust every morning.

As you are well aware, Sheet Metal Fabrication is fertile ground for air pollutants, both in solid and gaseous forms. The Air Probe Sanitizer has minimized a major problem for our office equipment and staff and we would highly recommend your system to any business utilizing a central air conditioning unit.

Sincerely,

Nancy S. Transport, Office Manager
