RE: Ultraviolet Light Air Treatment In Radiation Oncology Department

Dear Richard,

Oh behalf of our staff, and most importantly our patients, I want to thank you sincerely for donating the above referenced ultraviolet light treatment for the air handling system in the Radiation Oncology Department at Bethesda Memorial Hospital. It pleases me greatly that you were kind enough to designate us as the beneficiary of this donation, particularly after sharing with us the poor quality of the air handlers serving our department. Maybe it is my imagination, but it already seems that the quality of the air has improved. Once again thank you sincerely for thinking of us and providing us with this greatly needed service.

We all hope that you and your family have a joyous holiday season. Again, thanks for your consideration.

Bruce D. Greene, MD
Radiation Oncologist
