Dear Mr. Scroggins:

This letter should serve as my congratulations to you on an extraordinary product.

Before you installed the UV systems in my home I experienced great difficulty with allergies and extreme low levels of energy. I would take two prescription pills daily and awake each morning congested and unable to breathe. I would sneeze, cough and blow my nose for about four hours then I might start sounding like myself or maybe not.

I have not taken any allergy medicine in a month now and I can breathe as soon as I awake. I also have noticed an increase in energy and a decrease in the amount of dust in my home.

I have told everyone I know about your product and the fantastic results I have experienced and I though you should also know how satisfied I am.

Thank you again for clean air to breathe.

Sincerely,

Deborah Downes
