

August 10, 1997

Dear Mr. Scroggins:

I am writing to tell you of the miracle that has taken place in our home since the installation of our Ultra Germicidal Air Probe Sanitizer. I guess the best way to explain my excitement over the Ultra Violet Air Cleaner; I need to start with a little history. Approximately 2 years ago my youngest son, Austin, got extremely sick and we had to rush him to the emergency room at 1:00 a.m. Austin's chest was heaving and he could not catch his breath. As we sat in the emergency room beside our son, we had many conversations with the doctor, and not one time did the doctor commit that Austin would make it through the night. Later that morning, Austin was moved to the Intensive Care Unit where he remained for six nights. Austin was finally released on the seventh day. Since being released, Austin has been on medication continuously and has had many asthmatic coughing attacks. The doctors have labeled him asthmane and has been in and out of doctors offices since almost passing away two years ago. So there we were treating Austin on a daily basis with no hope of cure, until I met you and purchased your Ultra Violet Germicidal Air Probe Sanitizer. Since installation of the clean air machine, Austin, has not needed any treatments and has been of medication completely. It truly has been a life saver!

Sincerely,

Gregory J. McClure
