PALM BEACH COUNTRY FIRE-RESCUE  
SUPPORT SERVICES MEMORANDUM

Date: March 12, 1997

To: Mr. William Scroggins

From: Thomas Wenham, CPM, Capitol projects/telecommunications  
Manager

Re: Ultraviolet Light System

---

This memorandum is to advise you that since the installation of the ultra Germicidal Air Probe Sanitizer system in several of our stations the occupants of these stations seem to be satisfied with the air quality situation. Prior to the sanitizer system installation there were some firefighters who complained about watery eyes, runny noses and coughing. The sanitizer system has cleared up the previously received calls about the condition of the air in the several user stations. If other station air quality situations should arise, I would propose installing the sanitizer system.

Copy: Larry Koester, Deputy Chief, Support Services.
